

NORBAR HT2/5 HD 1 MANUAL TORQUE MULTIPLIERS 170-1700NM, Output Square: 1", Input Square: 1/2"

Multiple stages of epicyclic gearing are used in Norbar's 'HandTorque' multipliers to provide a wide range of torque outputs and ratios to suit most applications. The torque multiplication ratio is always quoted, not the velocity ratio as some competitors' goods claim. For example, a velocity ratio of 29.8:1 would result in a torque multiplication of 25:14%.

Specifications	Details
Model Number	HT2/5 HD 1"
Multiplication Ratio	5:1
Output Square	1"
Input Square	1/2"
Velocity Ratio	5.454:1
Brand	Norbar
Plate Weight	2.2 Kg
Accuracy	+/-4%
Product Number	16030.HD
Tool Weight	3.2 Kg
Range Metric	170 - 1700 NÂ·m
Range Imperial	125 - 1250 lbfÂ·ft
Max Input Speed	42 revs/min
Plate Torque	9 N.m
