

## Norbar HT5/75 1 Manual Torque Multipliers 340-3400NM, Output Square: 1", Input Square: 1/2"

Multiple stages of epicyclic gearing are used in Norbar's 'HandTorque' multipliers to provide a wide range of torque outputs and ratios to suit most applications. The torque multiplication ratio is always quoted, not the velocity ratio as some competitors' goods claim. For example, a velocity ratio of 29.8:1 would result in a torque multiplication of 25:14%.

Specifications	Details
Brand	Norbar
Model Number	HT5/75 1"
Multiplication Ratio	75:1
Output Square	1"
Input Square	1/2"
Velocity Ratio	93.137:1
Plate Weight	2.5 Kg
Range Imperial	250 - 2500 lbf·ft
Range Metric	340 - 3400 N·m
Product Number	16064.75
Accuracy	+/-4%
Tool Weight	7.9 Kg
Max Input Speed	315 revs/min
Plate Torque	19 N.m
