

## NORBAR HT7/75 1 1/2 MANUAL TORQUE MULTIPLIERS 600-6000NM

Multiple stages of epicyclic gearing are used in Norbar's 'HandTorque' multipliers to provide a wide range of torque outputs and ratios to suit most applications. The torque multiplication ratio is always quoted, not the velocity ratio as some competitors' goods claim. For example, a velocity ratio of 29.8:1 would result in a torque multiplication of 25:14%.

Specifications	Details
Range Imperial	450 - 4500 lbf·ft
Range Metric	600 - 6000 N·m
Max Input Speed	175 revs/min
Plate Torque	75 N.m
Accuracy	+/-4%
Tool Weight	11.1 Kg
Plate Weight	6.3 Kg
Product Number	16068.75
Brand	Norbar
Model Number	HT7/75 1 1/2"
Multiplication Ratio	75:1
Output Square	1 1/2"
Input Square	1/2"
Velocity Ratio	93.137:1
