

NORBAR HT7/75 1 1/2 MANUAL TORQUE MULTIPLIERS 600-6000NM

Multiple stages of epicyclic gearing are used in Norbar's 'HandTorque' multipliers to provide a wide range of torque outputs and ratios to suit most applications. The torque multiplication ratio is always quoted, not the velocity ratio as some competitors' goods claim. For example, a velocity ratio of 29.8:1 would result in a torque multiplication of 25:14%.

Specifications	Details
Velocity Ratio	93.137:1
Input Square	1/2"
Output Square	1 1/2"
Multiplication Ratio	75:1
Model Number	HT7/75 1 1/2"
Brand	Norbar
Product Number	16068.75
Plate Weight	6.3 Kg
Tool Weight	11.1 Kg
Accuracy	+/-4%
Plate Torque	75 N.m
Max Input Speed	175 revs/min
Range Metric	600 - 6000 NÅ·m
Range Imperial	450 - 4500 lbfÅ·ft
