

COBALT DRILL FOR STAINLESS STEEL | **10.00mm DIA**

Due to the inclusion of 5% cobalt to their alloys, the Kennedy line of heavy duty straight shank jobber drills with HSS-Co delivers dependable and long-lasting cutting performance at high temperatures and speeds. They can drill steels with tensile strengths of up to 1,400 N/mm², very hard bronze, stainless steels, as well as steels that are heat- and acid-resistant thanks to their toughness and heat resistance.

Specifications	Details
Drill Diameter	10 mm
Length	133mm
