CENTER 320 Sound Level Meter |
Lo=30~80dB ; Med=50~100dB ;
Hi=80~130dB

A Sound Level Meter (SLM) is a device (often hand-held) created to measure sound levels in a consistent manner. It provides accurate, repeatable measurements of sound pressure levels and responds to sound in a manner that is similar to that of the human ear.

Specifications	Details
Weight	Approx.280g
Battery	9V battery
Frequency (Hz)	31.5Hz to 8KHz
Dimensions	275x64x30 mm
Accuracy	±1.5dB (ref 94dB@1KHz)
Range	Lo=30~80dB ; Med=50~100dB ; Hi=80~130dB
