

DWYER Differential Pressure Gauge | Range 0 to 15 psi | 1/8" NPT Female | Dual Single-Side or Back

These gauges are designed for use with lower total static system pressure. They measure and indicate differential pressure of air and compatible gases or liquids. The gauges are commonly used for reading pressure in isolation and hospital environments and temporary units.

Specifications	Details
Pressure Range	0 to 15 psi
Accuracy	±2.0%
Dial Size	4"
Connection Size	1/8"
Casing material:	Aluminum
