

**DWYER Handheld Digital Manometer | Range  
0 in wc to 200 in wc | 4 Digit LED |  
Intrinsically Safe,**

These digital manometers are designed with components that have low-energy discharge to prevent ignition in hazardous environments with combustible or explosive gas or dust present. They are rated intrinsically safe, operate on low currents, and operate on low voltage. They are frequently used to calibrate pressure gauges, measure air velocity, and check natural gas and HVAC systems.

Specifications	Details
Connection Size	1/8 in; 3/16 in
Storage Temperature	-4° to 176°F
Resolution	0.1 in wc
Maximum operating temperature	140 °F
Pressure Range	0 in wc to 200 in wc
Accuracy	±0.5%
Display	4 Digit LED
