

Elitech RCW-360P-WiFi-THDE | WIFI Digital Data Logger | Real-Time Temperature Humidity Location Tracker

The improved RCW-360 series, known as the RCW-360 Plus series, has features including temperature monitoring, alarms, data recording, data uploading over WiFi or 4G, and Bluetooth printing. It is extensively utilized in the food, pharmaceutical, catering, logistics, and other sectors that need to be certified under the HACCP system. It can send data to our cold-chain cloud platform via WiFi or 4G. Through a smartphone app or web browser, users may remotely examine, manage, and keep an eye on data. Even in the event of a cold storage power outage, it can still function as a platform warning service and upload data in real-time thanks to an included rechargeable lithium battery.

Specifications	Details
Power	Adaptor : 5V/2A or 9V/1.5A (DC)
Temperature Range	Internal-4â~140â(-20â~+60â); External-40â~176â(-40â~80â)
Accuracy	Â±0.9â/Â±0.5â
Resolution	0.18â(0.1â)
Memory Capacity	100,000 points
Logging Rate	1 minute to 24 hours. Default interval is 30 minutes
Battery	Rechargeable lithium battery
Protection	IP64
communication	4G/WiFi
Alarm	Sound, SMS, email and mobile App
