

## Engis 8-FS-375 5gm HYPREZ DIAMOND COMPOUND

Lapping & Pre-Polishing Hyprez Fivestar combined formula compound provides the unsurpassed cutting capability of natural diamond with the impact resistance of manufactured diamond. Formulated to withstand severe lapping conditions, the use of a stable carrier ensures sustained particle suspension throughout the process and an even surface coverage improving impregnation of laps. Suitable for use with Hyprez type OS (Oil Soluble) or Type W (Water Soluble) lubricants to meet specific requirements of material and surface finish. The Hyplicator dispensing syringe allows a precisely measured amount of compound to be applied, preventing contamination and wastage.

| Specifications      |   | Details          |
|---------------------|---|------------------|
| Product Type        |  | Diamond Compound |
| Weight              |   | 5 g              |
| Product Number      |   | 104.1029         |
| SKU                 |   | ENG2571160GTSS   |
| Colour              |   | Red              |
| Size                |   | 5g               |
| Grain Size (Micron) |   | 8                |
| Concentration       |   | FS-375           |
| Brand               |   | Engis            |
